Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where ss indicates the S-level commodity code (from 9 to 28) mm indicates the M-level commodity code (from 14 to 43, 45 to 69) nn indicates either a spiit of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details, ppp indicates the PCG code (except for some special aggregations which include several PCGs). The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E-4S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 52-556).

En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où: si indique le code du niveau S des produits (de 9 à 28) a sin indique le code du niveau M des produits (de 14 à 43, 45 à 69) nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers. pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP) rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique un estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E+S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de reférence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLEAU 3. Indices des prix des produits industriels, par industries et groupes d'industries(1)

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six moits shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The agregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agregation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux différent occasionnellement en raison de l'arrondissement, l'indice total - toutes les industries manufacturiers sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

Monthly prices are collected and processed three times per annum.

Des prix mensuels sont relevés et calculés trois fois par année.

Indexes for the current year and previous year are subject to revision.

Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

## TABLEAU 6. Indices des prix des matières brutes

1986 = 100

# EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

#### Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

## **Price Surveys**

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

# EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

## Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

#### Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

#### Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

#### **Formula**

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w<sup>i</sup> are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

## Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

#### **Formule**

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w<sup>i</sup> sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_{i} \frac{w^{i}}{\sum_{w^{i}}} \cdot P_{t/o}^{i}$$

| (agg)            |            |        |           |        |        |    |      |
|------------------|------------|--------|-----------|--------|--------|----|------|
| P <sub>t/o</sub> | denotes    | the    | compos    | site   | price  | ir | ndex |
|                  | movemen    | t betw | een the   | base   | period | 0  | anc  |
|                  | time t for | the de | fined ago | gregat | e;     |    |      |
|                  |            |        |           |        |        |    |      |

is the transaction value of the element i in the base period;

is the price index for element i, meaning its price change from the base period to time t;

indicates summation over all elements i in the defined aggregate.

 wi est la valeur de transaction de l'élément i au cours de la période de référence;

est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

 $\sum_i$  signifie la sommation de tous les éléments i dans l'agrégat défini.

#### Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

## **Reference Documents**

62-558 Industry Price Indexes, 1986 = 100: users' guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

#### Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

#### Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs. 40.00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

## RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

## INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entréessorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/0}^{(agg)} = \sum_{i} \frac{w^{i}}{\sum_{w^{i}}} \cdot P_{t/0}^{i}$$

(agg)

| (agg)<br>P <sub>t/o</sub> | denotes the composite price index movement between the base period o and time t for the defined aggregate; |
|---------------------------|--|
| W <sup>i</sup>            | is the transaction value of the element i in 1986;   |
| P <sub>t/O</sub>          | is the price index for element i, meaning its price change from the base period o to time t;               |
| $\sum_{i}$                | indicates summation over all elements i in the defined aggregate.  |

Pt/o entre la période de référence o et la période courante t pour l'agrégat spécifié; est la valeur de transaction de l'élément i en 1986;

dénote le mouvement de l'indice composite de prix

est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t:

 $\sum_{i}$ indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

### Reference Document

See reference document in IPPI. Document contains the weighting pattern of the Raw Materials Price Indexes.

# ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The midexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

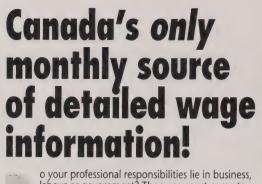

#### INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue. conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril. d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

labour or government? Then you must come to grips with how changes in the price of labour can impact on your organization. Employment, Earnings and Hours is the journal to help you evaluate the implications of wage and salary fluctuations.

Employment, Earnings and Hours is based on data from 42,000 Canadian firms. It's the largest monthly business survey

Employment,

Earnings and Hours

in the country. And it's the only source of weekly and hourly earnings data in Canada, Éach issue reports on the number of payroll employees by industry, average standard work weeks, overtime payments and much more! And the data covers over 280 major industry groups! Each month,

**Employment, Earnings** and Hours includes a succinct "Highlights" section reporting on major monthly developments. And every quarter, a feature article analyses a significant labour topic that will Canada increase your knowledge of Canada's labour market.

Use Employment, Earnings and Hours to:

· safeguard your company from industry-specific cost increases or losses due to inflation when signing multi-year contracts;

- strengthen your position for negotiating wage increases and salary adjustments;
- make your contract bids more competitive;
- pinpoint future wage and salary expenditures.

Employment, Earnings and Hours will help you track wage changes, analyse the employment situation by industry, measure the economic performance of your firm against the average for firms in similar industries and develop escalation clauses in long-term contracts.

Subscribe to **Employment**, **Earnings and Hours** (Catalogue no. 72-002) for \$285 (plus \$19.95 GST) in Canada, US\$342 in the United States and US\$399 in other countries. If you aren't completely satisfied with your subscription - for any reason - you may cancel and receive a full refund on all undelivered issues!

# MERCIODE VOTRE COMMANDE!

Statistique Canada Statistics Canada Canada

# No other monthly report on the Canadian Economy has this much to offer

# La seule publication à vous offrir autant d'information sur l'économie canadienne

#### Canadian Economic Observer

The most extensive and timely information source for people who want objective facts and analysis on the Canadian Economy... every

#### Current economic conditions

Brief, "to the point" a current update summary of the economy's performance including trend analyses on employment, output, demand and the leading indicator.

#### Feature articles

In-depth research on current business and economic issues: business cycles, employment trends, personal savings, business investment plans and corporate concentration

#### Statistical summary

Statistical tables, charts and graphs cover national accounts, output, demand, trade, labour and financial markets.

#### Regional analysis

Provincial breakdowns of key economic indicators.

#### International overview

Digest of economic performance of Canada's most important trading partners — Europe, Japan and the U.S.

#### Economic and statistical events

Each month, CEO also publishes a chronology of current events that will affect the economy, and information notes about new products from Statistics Canada.

#### Consult with an expert

The names and phone numbers of the most appropriate Statistics Canada contacts are provided with each data table in the statistical summary; not only can you read the data and the analysis, you can talk to the experts about it.

#### The Canadian Economic Observer

(Catalogue no. 11-010) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster service, fax your order to 1-613-951-1584. Or call toll free at 1-800-267-6677 and use your VISA or MasterCard.

#### L'Observateur économique canadien

La revue la plus complète et la plus à jour qui soit pour les gens qui désirent des renseignements objectifs et une analyse de l'économie canadienne... chaque mois.

#### Les conditions économiques actuelles

Résumé bref et incisif de l'actualité économique du mois, comportant l'analyse des tendances de l'emploi, de la production, de la demande et de l'indicateur avancé

#### Les études spéciales

Recherche approfondie sur les questions du domaine des affaires et de l'économie : cycles économiques, tendances de l'emploi, épargne personnelle, projets d'investissement et concentration des sociétés.

#### L'aperçu statistique

Tableaux, graphiques et diagrammes englobant les statistiques des comptes nationaux, de la production, de la demande, du commerce, de l'emploi

et des marchés financiers.

#### L'analyse régionale

Ventilation par province des indicateurs économiques stratégiques.

#### Le survol de l'économie internationale

Un sommaire du rendement de l'économie des partenaires commerciaux du Canada, comme l'Europe, le Japon et les États-Unis.

#### Événements économiques et statistiques

Chaque mois, L'OEC publie une chronologie des événements qui influenceront l'économie de même que des renseignements sur les nouveaux produits de Statistique Canada.

#### Consultez un expert

Les noms et numéros de téléphone des personnes-ressources figurent à chaque tableau de l'aperçu statistique; non seulement pouvez-vous lire les données et l'analyse, mais vous pouvez de plus discuter du sujet avec les experts de Statistique Canada.

#### L'Observateur économique canadien.

(nº 11-010 au catalogue) coûte 220 \$ l'abonnement annuel au Canada, 260 \$ US aux États-Unis et 310 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

Pour un service plus rapide, commandez par télécopieur au 1-613-951-1584. Ou composez sans frais le 1-800-267-6677 et utilisez votre carte VISA ou MasterCard.

## THE COMPLETE PICTURE ON SURFACE AND MARINE

# RANGE

#### SAVE 20% WHEN YOU INVEST IN 4 LEADING EDGE PUBLICATIONS

eregulation, free trade and global integration all affect the face of the transportation industry – and make it essential to stay on top of all aspects of the industry.

When all the rules are changing, data on how the industry is evolving is crucial. And Statistics Canada has put together a special 4-publication package of data you can count on for information on all areas of surface and marine transportation.

#### Trucking in Canada

A complete analytical overview of changes in the industry and specific statistics on everything from Canada-U.S. trucking traffic to fuel use are covered in this annual publication.

Cat. No. 53-222. Annual. \$45 (plus GST) in Canada, US\$54 in the United States, and US\$63 in other countries.

#### Rail in Canada

Includes an overview of the structure and activity of the rail industry. The financial, operating and commodity statistics provide a comprehensive framework for intermodal comparisons. And data on the origin and destination of international commodity movements are vital for studying the effects of free trade and other global developments.

Cat. No. 52-216. Annual. \$45 (plus GST) in Canada, US\$54 in the United States, and US\$63 in other countries.

#### Shipping in Canada

Major indicators on vessel traffic and port traffic data (including 41 commodity groups, containerized cargo and the ports of origin and destination).

Cat. No. 54-205. Annual. \$41 (plus GST) in Canada, US\$49 in the United States, and US\$57 in other countries.

#### Surface and Marine Transport Bulletin

Eight issues a year keep you informed on the latest transportation statistics, including the Quarterly Motor Carrier Freight data. And much more.

Cat. No. 50-002. Eight issues per year. \$75 (plus GST) in Canada, US\$90 in the United States, and US\$105 in other countries.

#### The Special Transportation Package

will keep you up-to-date on new trends, industry comparisons and leading indicators.

Best of all, you save 20% when you invest in all four publications! Order the *Special Transportation Package* and pay only \$165 (plus GST) in Canada, US\$198 in the U.S. and US\$230 in other countries. Quote package number 10-234.

a déréglementation, le libre-échange et l'intégration globale sont tous des facteurs qui influent sur le secteur des transports. Il est donc essentiel de suivre l'évolution de tous les aspects de ce secteur.

Il est crucial de posséder des données sur l'évolution d'un secteur lorsque celui-ci fait l'objet d'une déréglementation. Statistique Canada a créé une série spéciale de quatre publications qui présentent des données sur tous les aspects des transports maritime et terrestre.

#### Le camionnage au Canada

Cette publication comporte une analyse détaillée de l'évolution de ce secteur d'activité, ainsi que des statistiques précises sur des sujets variés, du trafic entre le Canada et les États-Unis à la consommation de carburant.

Publication annuelle nº 53-222 au catalogue. 45 \$ (TPS en sus) au Canada, 54 \$ US aux États-Unis et 63 \$ US dans les autres pays.

#### Le transport ferroviaire au Canada

Cette publication présente un aperçu de la structure et des activités du secteur du transport ferroviaire. Les données détaillées sur les finances, l'exploitation et les marchandises transportées permettent d'établir des comparaisons entre les différents modes de transport. Par ailleurs, les données sur l'origine et la destination des mouvements internationaux de marchandises sont essentielles à l'étude des effets du libre-échange et d'autres événements internationaux.

Publication annuelle n° 52-216 au catalogue. 45 \$ (TPS en sus) au Canada, 54 \$ US aux États-Unis et 63 \$ US dans les autres pays.

#### Le transport maritime au Canada

La publication présente d'importants indicateurs sur le trafic des navires et le trafic portuaire (y compris 41 groupes de marchandises, le fret conteneurisé ainsi que les ports d'origine et de destination).

Publication annuelle nº 54-205 au catalogue. 41 \$ (TPS en sus) au Canada, 49 \$ US aux États-Unis et 57 \$ US dans les autres pays.

#### Bulletin de service sur les transports terrestre et maritime

Dans les huit numéros, vous trouverez les statistiques les plus récentes sur les transports, ainsi que les données de l'Enquête trimestrielle sur les transporteurs routiers de marchandises, et plus encore.

Publication n° 50-002 au catalogue. Huit numéros par année au coût de **75** \$ (TPS en sus) au Canada, **90** \$ US aux États-Unis et **105** \$ US dans les autres pays.

## Grâce à cette série spéciale de publications sur les transports

vous serez informé des nouvelles tendances, des comparaisons établies et des indicateurs clés.

En plus, vous obtenez un rabais de 20 % à l'achat des quatre publications. Commandez la série spéciale sur les transports et ne payez que 165 \$ (TPS en sus) au Canada, 198 \$ US aux États-Unis et 230 \$ US dans les autres pays. Citez la série nº 10-234.

#### Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct on-line access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

#### How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section, Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

| St. John's | (1-800-565-7192) | Winnipeg  | (983-4020) |
|------------|------------------|-----------|------------|
| Halifax    | (426-5331)       | Regina    | (780-5405) |

#### Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimés d'ordinateur, microfiches et microfilms et bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

#### Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des industries de biens et de services, Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

#### Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

#### Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

#### **Symbols**

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

#### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Registered Trade Mark of Statistics Canada.

#### Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

#### Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

#### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Marque déposée de Statistique Canada.

#### Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

This publication was prepared under the direction of:

- Michel Jacod, Director, Prices Division
- Robin Lowe, Chief, Goods & Services Producing Industries Section

Cette publication a été rédigée sous la direction de:

#### **Highlights**

#### **Industrial Product Price Index**

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) remained unchanged at April's revised level of 112.1. Indexes for thirteen of the 21 major groups of products increased while four decreased and four did not change. The most significant month-to-month changes were in lumber, sawmill and other wood products (-5.7%), automobiles, trucks and other transport equipment (+0.6%), and meat, fish and dairy products (+1.2%).

During May, the value of the US dollar rose 1.0% against the Canadian dollar, increasing the value of export prices quoted in American dollars. This particularly affected the index for automobiles, trucks, and other transport equipment. In May 1993, the American dollar was 5.9% higher against the Canadian dollar than in May 1992.

The IPPI was 3.2% higher in May 1993 than in May 1992. This is the lowest year-to-year change since October 1992. Finished goods and intermediate goods both played a role in this decline. Prices for finished goods fell in February and March, although in the last two months, they have risen again. In intermediate goods, first stage prices have been falling since September 1992 as a result of declines in pulp and metal prices. Second stage intermediate goods prices, buoyed up by softwood lumber price increases, began declining in April with the turn-around in lumber prices.

The lumber, sawmill and other wood products price index fell 5.7%, a second monthly decline of over 5%, but it was still 19.5% higher than in May 1992. The decline was primarily due to a 9.1% drop in softwood lumber prices. Declines ranged from almost 30% on the Prairies to under 4.5% in British Columbia and the Atlantic Provinces.

The automobiles, trucks and other transportation equipment price index rose 0.6% in May due to the change in the valuation of the Canadian dollar on the price of exports.

The meat, fish, and dairy products index rose 1.2% in May. Central to this increase was a 2.8% increase in beef and veal prices and a 5.0% increase in pork prices. Pork prices have risen 29.9% and beef and veal prices have risen 17.2% since January 1992, pushing the meat, fish, and dairy products index up 8.6%.

The primary metal products price index fell 0.5% in May, its fourth consecutive monthly decline. This decline resulted from price declines for copper and copper alloy products, -5.6%, nickel products, -2.4%, and aluminum products, -0.7%. Iron and steel products, however, rose 0.1% and other non-ferrous metal products rose 2.2%, principally due to precious metal price increases.

#### Faits saillants

#### Indice des prix des produits industriels

Selon les chiffres provisoires, l'indice des prix des produits industriels (IPPI, 1986 = 100) demeure inchangé par rapport au niveau révisé de 112,1 enregistré en avril. Les indices de treize des 21 grands groupes de produits augmentent alors que quatre diminuent et quatre n'enregistrent aucune variation. Les variations d'un mois à l'autre les plus importantes sont observées pour l'indice des sciages, produits de scierie et divers produits du bois (-5,7%), l'indice des voitures, camions et autre matériel de transport (+0,6%) et l'indice de la viande, du poisson et des produits latiters (+1,2%).

En mai, la valeur du dollar américain progresse de 1,0% par rapport au dollar canadien, ce qui fait augmenter la valeur du prix des exportations libellées en dollars américains. Cette appréciation influence plus particulièrement l'indice des voitures, camions et autre matériel de transport. Entre mai 1992 et mai 1993, le cours du dollar américain par rapport au dollar canadien augmente de 5,9%.

L'IPPI s'établit en mai 1993 à un niveau de 3,2% supérieur à celui de mai 1992. Il s'agit là du plus faible changement d'une année à l'autre enregistré depuis octobre 1992. Les produits finis et semi-finis ont eu un impact sur cette baisse. Dans le cas des produits finis, les prix ont diminué en février et mars, toutefois ils ont augmenté au cours des deux derniers mois. Pour les produits semi-finis, le prix des produits de première étape régresse depuis septembre 1992, en raison de la baisse du prix des pâtes de bois et du prix du métal. Le prix des produits semi-finis de deuxième étape, soutenu par la hausse du prix du bois résineux, commence à baisser en avril à cause du renversement de l'évolution du prix du bois.

L'Indice des prix des sciages, produits de scierie et divers produits du bois recule de 5,7%, ce qui constitue une seconde baisse mensuelle de plus de 5%. Il demeure néanmoins supérieur de 19,5% au niveau enregistré en mai 1992. Le recul est surtout attribuable à une chute de 9,1% du prix du bois résineux. Les baisses sont comprises entre près de 30% dans les Prairies à moins de 4,5% en Colombie-Britannique et dans les provinces de l'Atlantique.

L'Indice des prix des voitures, camions et autre matériel de transport augmente de 0,6% en mai en raison des effets de la variation de la valeur du dollar canadien sur le prix des exportations.

L'Indice des prix de la viande, du poisson et des produits laitiers progresse de 1,2% en mai. Cette hausse est en grande partie attribuable aux augmentations de 2,8% du prix du boeuf et du veau et de 5,0% du prix du porc. Depuis janvier 1992, le prix du porc s'est accru de 29,9% et celui du boeuf et du veau, de 17,2%. Cet accroissement a pour conséquence une hausse de 8,6% de l'indice des prix de la viande, du poisson et des produits laitiers.

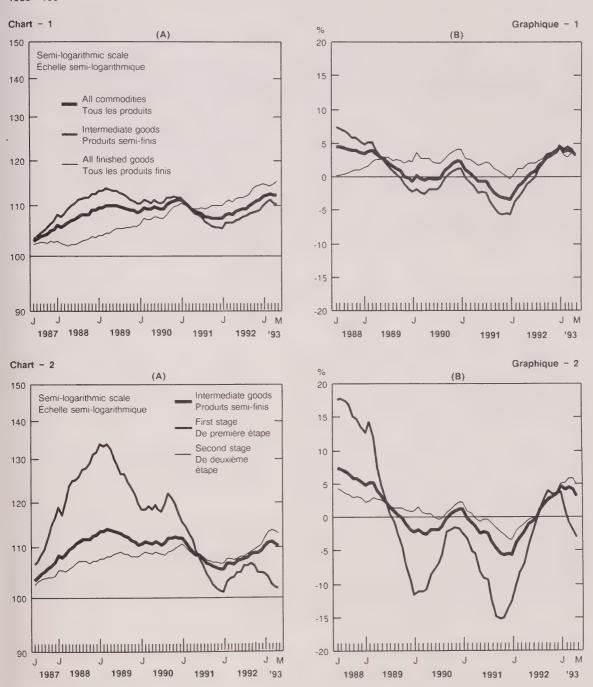

L'Indice des prix des produits métalliques primaires régresse de 0,5% en mai, ce qui constitue la quatrième baisse mensuelle consécutive. Cette baisse s'explique par le recul des prix des produits du cuivre et d'alliage de cuivre (-5,6%), des produits du nickel (-2,4%) et des produits de l'aluminium (-0,7%). Cependant, le prix des produits du fer et de l'acier augmente de 0,1% et celui des autres produits de métaux non ferreux, de 2,2%. Ces hausses sont en grande partie attribuables à l'augmentation du prix des métaux précieux.

#### **Highlights**

#### Raw Materials Price Index

According to preliminary figures, the Raw Materials Price Index (RMPI, 1986 = 100) was 115.2 in May 1993, up 1.2% from the previous month. Five of the seven major indexes went up, led by wood (+5.3%). Indexes for non-ferrous metals and mineral fuels dropped slightly, both less than 1%.

The RMPI in May 1993 was 9.3% higher than in May 1992, mainly due to the increases in wood (+43.3%) and animals and animal products (+4.9%). The increase was moderated by the 4.2% decline in the non-ferrous metals index. Movements in these major groups have been the main influence on the RMPI since January 1992 when it began its current climb.

The 5.3% rise in the wood index in May 1993 was primarily because of the 7.0% increase in the logs and bolts component, which has been on an uptrend since December 1991. Compared with May 1992, the wood index has soared 43.3% because of a nearly 60% increase in the prices for logs and holts.

The index for animals and animal products was up by 1.0% in May, largely because of a 3.8% rise in the prices for cattle and calves. From May 1992 to May 1993, the animals and animal products index increased 4.9%; major contributing factors were cattle and calves (+15.6%) and hogs for slaughter (+4.8%).

The vegetable products index rose 1.5% in May 1993, mainly because of a strong increase in the unrefined sugar index (+19.1%). On the other hand, grain prices dropped 2.3%. Compared with May 1992, the vegetable products index was up 4.3%, reflecting the rise in the indexes for unrefined sugar (+36.0%), oilseeds (+10.4%), and raw tobacco (+9.7%). However, the growth in the index was moderated by the drops in prices for grains (-6.1%) and fresh fruit (-18.0%).

The mineral fuels index slipped 0.5% in May 1993, as crude mineral oil prices, its principal component, fell 0.6% and the natural gas index fell 1.0%. The mineral fuels index rose 2.6% from May 1992; all three of its major components increased over the 12-month period, but the 2.5% rise in crude mineral oil caused most of the increase.

The non-ferrous metals index fell 0.8% in May 1993 because of declines in copper concentrates (-7.5%) and nickel concentrates (-3.8%). The main increase was 10.0% in precious metals prices. The 12-month decrease in non-ferrous metals was 4.2%, mainly because of declines for concentrates of copper (-15.8%), zinc (-22.3%) and nickel (-19.3%), and for aluminum materials (-7.9%). These decreases were moderated by a rise in precious metals (+14.4%) and radioactive concentrates (+33.1%).

#### Faits saillants

#### Indice des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1986 = 100) a atteint 115.2 en mai 1993, soit une augmentation de 1,2% par rapport au mois précédent. Cinq des sept indices majeurs ont enregistré des hausses, la plus importante étant celle du bois (5,3%). D'autre part, l'indice des métaux non ferreux et l'indice des combustibles minéraux ont enregistré des baisses inférieures à 1%.

Par rapport au mois de mai 1992, l'IPMB a progressé de 9,3%, principalement en raison des augmentations des indices du bois (43,3%), et des animaux et substances animales (4,9%). L'effet à la hausse a été partiellement atténué par la baisse de 4,2% de l'indice des métaux non ferreux. Les mouvements de ces groupes majeurs expliquent en grande partie la progression actuelle de l'IPMB qui remonte au mois de janvier 1992.

L'indice du bois a progressé de 5,3% en mai 1993, en raison de l'augmentation de 7,0% de l'indice des billes et billots, qui poursuit sa croissance entreprise en décembre 1991. Par rapport à mai 1992, l'indice du bois a augmenté de 43,3%, en raison de la hausse d'environ 60% de l'indice des billes et billots.

L'indice des animaux et substances animales a connu une légère progression de 1,0% en mai 1993 qui est attribuable en grande partie à l'augmentation de l'indice des bovins (3,8%). De mai 1992 à mai 1993, l'indice des animaux et substances animales a progressé de 4,9% principalement en raison des augmentations des indices des bovins et veaux (15,6%) et du porc destiné à l'abattage (4,8%).

L'indice des substances végétales est en hausse de 1,5% en mai 1993, principalement à cause de la forte augmentation de l'indice du sucre non raffiné (19,1%). D'autre part, l'indice des céréales a chuté de 2,3%. Par rapport à mai 1992, l'indice des substances végétales a augmenté de 4,3%, en raison de la hausse des indices du sucre non raffiné (36,0%), des oléagineux (10,4%), et du tabac en feuilles (9,7%). Cependant, la croissance de l'indice fut atténuée par la diminution des indices des céréales (-6,1%), et des fruits frais (-18,0%).

L'indice des combustibles minéraux a diminué de 0,5% en mai 1993, suite à une diminution de 0,6% de sa principale composante, l'indice des huiles minérales brutes et une baisse de 1,0% de l'indice du gaz naturel. L'indice des combustibles minéraux a augmenté de 2,6% depuis mai 1992; bien que les trois composantes de cet indice ont connu des hausses, sa progression est surtout attribuable à l'augmentation de 2,5% de l'indice des huiles minérales brutes.

Quant à l'indice des métaux non ferreux, il a enregistré une baisse de 0,8% en mai 1993 suite à la diminution des indices des concentrés de cuivre (-7,5%) et de nickel (-3,8%). Ces diminutions ont été partiellement atténuées par l'augmentation de l'indice des métaux précieux (10,0%). Au cours des douze derniers mois, l'indice des métaux non ferreux a diminué de 4,2%, principalement à cause de la baisse des indices des concentrés de cuivre (-15,8%), de zinc (-22,3%) et de nickel (-19,3%), et des matériaux d'aluminium (-7,9%). Ces baisses ont été atténuées par une hausse des indices des métaux précieux (14,4%) et des concentrés radio-actifs (33,1%).

Note:

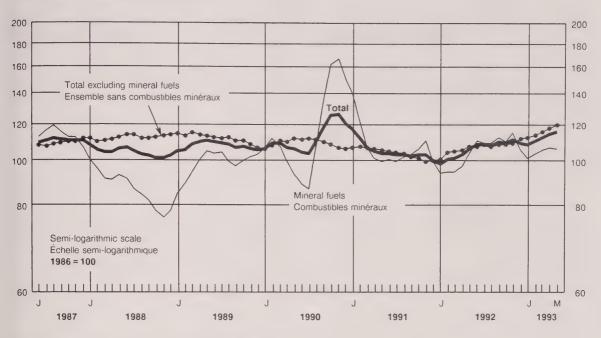

This shows the amount by which the movement of each index would move the total in the absence of any change in the other indexes. Ce chiffre donne l'ampleur de la variation qu'occasionnerait dans l'indice d'ensemble un mouvement d'un indice donné si tous les autres indices demeuraient

inchangés. These indexes are preliminary

<sup>(2)</sup> (2) Ces indices sont provisoires.

Indexes for the most recent six months shown are subject to revision. Les indices figurant pour les six mois les plus récents sont sujets à révision. Nota:

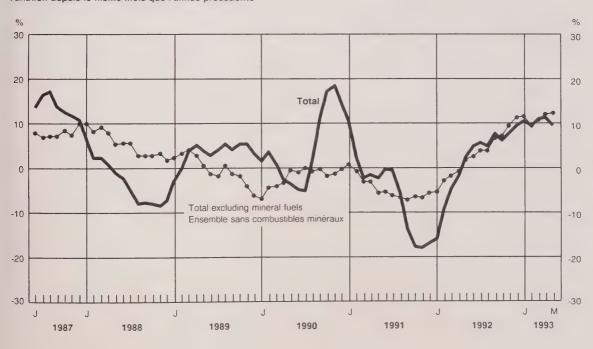

## Raw Materials Price Index Indice des prix des matières brutes

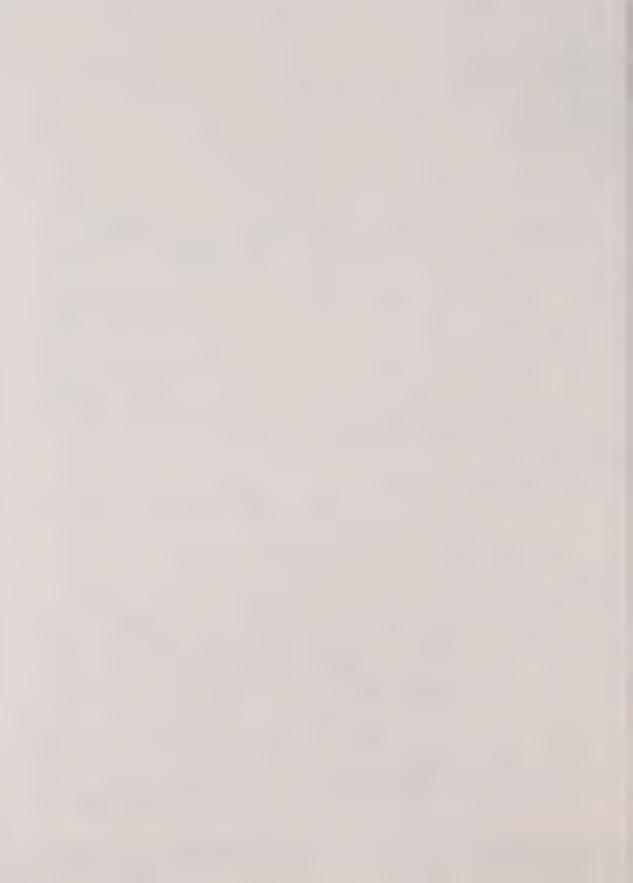

#### Percentage Change in the Raw Materials Price Index Variation en pourcentage de l'indice des prix des matières brutes

From same month of previous year

Variation depuis le même mois que l'année précédente

Indexes for the most recent six months shown are subject to revision

Indexes for the most recent six months shown are subject to revision.

Les indices figurant pour les six mois les plus récents sont sujets à révision.

The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where ss indicates the S-level commodity code (from 14 to 43, 45 to 69) nn indicates the H-level commodity code (from 14 to 43, 45 to 69) nn indicates either a split of the M-level commodity, or 91, which indicates special aggregation or 99, which indicates special aggregation or 99, which indicates special details popp indicates the PCG code (except for some special aggregations which include several PCGs). rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-555). En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM D ninnninn, un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où si indique le code du niveau M des produits (de 9 à 28) mi indique le code du niveau M des produits (de 14 à 43, 45 à 69) nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers. pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP) rr indique une composante d'un GPP. La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole. E indique un échantillonage exhaustif. S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonage direct (E+S). Ces mesures du degré de couverture sont parlois arrondies au 5% le plus prés alin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotes A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (nº 62-556 au catalogue).

TABLEAU 3. Indices des prix des produits industriels, par industries et groupes d'Industries(1)

1986 = 100

Note: Indexes for the most recent six months shown are subject to revision.

Indexes for the most recent six months snown are subject to revision. Les indices figurant pour les six mois les plus recents sont sujets à révision. The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities index shall be regarded as authoritative, and the All Manufacturing industries is adjusted to match. L'agregation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera

<sup>(1)</sup> 

Parrondissement, i indice total - tous les produits deriva en exchange control explanation (SIC) code. An ose égal. The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

Le code numerique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité. (2)

<sup>(2)</sup>

Monthly prices are collected and processed three times per annum.

Des prix mensuels sont relevés et calculés trois fois par année.

Indexes for the current year and previous year are subject to revision.

Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

## EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

#### **Price Surveys**

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

## EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le Quotidien. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

#### Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

#### Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Withincommodity weights can change in December of each year to reflect major changes in production patterns.

#### Formula

(agg)

 $\sum_{i}$ 

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w<sup>i</sup> are the values of the output of each commodity:

indicates summation over all elements i in

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

#### Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

#### **Formule**

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w<sup>i</sup> sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_{i} \frac{w^{i}}{\sum_{w^{i}}} \cdot P_{t/o}^{i}$$

| P <sub>t/o</sub> | denotes the composite price index movement between the base period o and time t for the defined aggregate; | Pt/o             | dénote le mouvement de l'indice composite de prix<br>entre la période de référence o et la période t pour<br>l'agrégat défini; |
|------------------|--|------------------|--|
| Wi               | is the transaction value of the element i in the base period;  | wi               | est la valeur de transaction de l'élément i au cours<br>de la période de référence;  |
| P <sub>t/o</sub> | is the price index for element i, meaning its price change from the base period to time t;                 | P <sub>t/o</sub> | est l'indice de prix de l'élément i, désignant sa<br>variation de prix entre la période de référence et la<br>période t;       |

(agg)

 $\sum_{i}$  signifie la sommation de tous les éléments i dans l'agrégat défini.

the defined aggregate.

#### **Historical Data**

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

#### **Reference Documents**

62-558 Industry Price Indexes, 1986 = 100: users' guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

#### Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

#### Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

### RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

#### INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entréessorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_{i} \frac{w^{i}}{\sum_{w^{i}}} \cdot P_{t/o}^{i}$$

| (agg)<br>P <sub>t/o</sub> | denotes the composite price index movement between the base period o and time t for the defined aggregate; | (agg)<br>P <sub>t/o</sub> | dénote le mouvement de l'indice composite de prix<br>entre la période de référence o et la période courante<br>t pour l'agrégat spécifié; |
|---------------------------|--|---------------------------|---|
| Wi                        | is the transaction value of the element i in 1986;   | W <sup>†</sup>            | est la valeur de transaction de l'élément i en 1986;  |

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

#### Reference Document

See reference document in IPPI. Document contains the weighting pattern of the Raw Materials Price Indexes.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

#### Document de référence

Voir le document de référence de l'IPPI, qui contient le schéma de pondération des indices de prix des matières brutes.

## ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

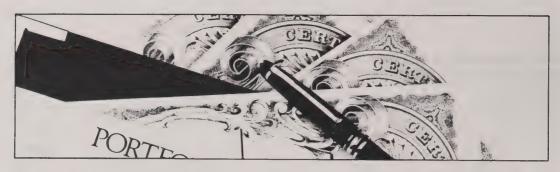

#### INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

#### Do you really have time to monitor over 200 Trusteed Pension Funds?

#### Y ou do – if you subscribe to Quarterly Estimates of Trusteed Pension Funds.

The only periodical of its kind in Canada, Quarterly Estimates surveys the 200 largest trusteed pension funds, which hold 85% of the assets of all trusteed funds. The result is detailed, aggregate estimates of the income, expenditure and assets of approximately 3,800 funds operating in Canada.

Each issue gives you:

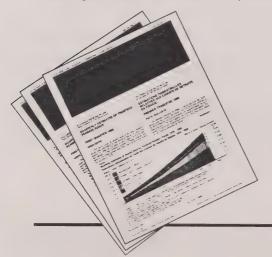

- current financial data for employee and employer contributions to the fund;
- investment income, profits and losses on sales of securities;
- · pension payments and annuity purchases.

Distribution of investment portfolios among such vehicles as stocks, bonds, pooled funds and short term holdings is also highlighted. The accompanying analysis examines trends, growth and performance over time.

#### Get the numbers.

Subscribe to **Quarterly Estimates of Trusteed Pension Funds,** (Catalogue No. 74-001) for the regular update you need. A subscription to this quarterly is \$44 annually in Canada, US\$53 in the United States and US\$62 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

## Vous avez le temps de vous renseigner sur plus de 200 caisses de retraite en fiducie?

#### O ui - si vous vous abonnez à Estimations trimestrielles relatives aux caisses de retraite en fiducie.

Ce périodique, unique en son genre au Canada, passe en revue la situation des 200 plus importantes caisses de retraite en fiducie, qui représentent 85 % de l'actif de l'ensemble des caisses de retraite. Le résultat prend la forme d'estimations détaillées et globales des recettes, des dépenses et de l'actif d'environ 3 800 caisses de retraite au Canada.

Chaque numéro vous présente :

- des données financières courantes relativement aux cotisations de l'employé et de l'employeur à la caisse de retraite;
- les revenus de placements ainsi que les profits et pertes sur les ventes de titres;
- les paiements des pensions et les achats de rentes.

Vous y trouverez également des renseignements sur la répartition des portefeuilles de placement entre les actions, les obligations, les fonds communs et les placements à court terme ainsi qu'une analyse des tendances, de la croissance et du rendement dans le temps.

#### Abonnez-vous!

La publication Estimations trimestrielles relatives aux caisses de retraite en fiducie (n° 74-001 au catalogue) vous permet d'obtenir régulièrement les données à jour dont vous avez besoin. L'abonnement à cette publication trimestrielle coûte 44 \$ par année au Canada, 53 \$ US aux États-Unis et 62 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1 A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

## MERCIODE VOTRE COMMANDE!

Statistique Canada Statistics Canada Canadä

## ARE YOU CONCERNED ABOUT CANADA'S COMPETITIVENESS IN THE GLOBAL MARKETPLACE?

You are not alone. Goods, money, information and technology are flowing across borders at an unprecedented pace. In order for us to be key players, we must keep informed. We must know:

- · how our products are sold to other countries
- · how to assess the foreign competition

Statistics Canada offers you five publications on the subject that can broaden your understanding of Canada's dealings with other countries.

#### CANADA'S INTERNATIONAL INVESTMENT POSITION

This publication gives a snapshot of Canada's international financial position, showing who's investing in what, in Canada and abroad at year end. Especially valuable analytical information is also provided on the relative position of both Canadian and foreign ownership and control of capital employed in Canada.

PRICE: \$37 (Cat. No. 67 -202)

#### SECURITY TRANSACTIONS WITH NON-RESIDENTS

Find out who's trading what on security markets with this monthly publication which presents Canada's trading in stocks, bonds and money market paper with non-residents. The December issue includes a description of sources and methods as well as complete data for the year.

PRICE: \$158

## CANADA'S BALANCE OF INTERNATIONAL PAYMENTS (HISTORICAL STATISTICS 1926 TO 1990)

For the first time, balance of payments data are available in the same format from 1926 to 1990, in one publication. You get:

- all the historical data in one place! summary tables for the current
- and capital accounts.
  selected additional data such as exchange rates and gross

domestic product.

...all in one compact, well-presented publication!

PRICE: \$50

#### CANADA'S INTERNATIONAL TRANSACTIONS IN SERVICES

This annual report looks at our international pattern of trade in services; travel, freight, business services, government and other services.

PRICE: \$32 (Cat. No. 67 -203)

#### CANADA'S BALANCE OF INTERNATIONAL PAYMENTS

Need a complete picture of Canada's international transactions? Then refer to this quarterly publication which outlines merchandise, services, investment income and transfers of the current account; and the financial transactions of the capital account. Transactions are shown for six geographical areas.

PRICE: \$110 (Cat. No. 67 -001)

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster ordering, call toll-free and use VISA or MasterCard

# LA SITUATION CONCURRENTIELLE DU CANADA SUR LES MARCHÉS INTERNATIONAUX VOUS PRÉOCCUPE-T-ELLE?

Vous n'êtes pas les seuls. Les produits, l'argent, l'information et la technologie franchissent les frontières à un rythme encore jamais vu. Si nous voulons faire partie des joueurs clés, nous devons être informés sur :

- comment nos produits sont vendus aux autres pays
- comment évaluer la place du Canada dans la concurrence étrangère À ce sujet, Statistique Canada met à votre disposition cinq publications qui peuvent élargir votre compréhension des relations économiques du Canada avec les autres pays.

#### BILAN DES INVESTISSEMENTS INTERNATIONAUX DU CANADA

Cette publication donne un instantané de la position financière internationale du Canada et montre qui investit dans quoi au Canada et à l'étranger, en fin d'année. S'y retrouvent aussi des renseignements sur l'importance de la propriété et du contrôle canadiens et étrangers du capital employé au Canada.

PRIX: 37 \$
(N°. 67 -202 au cat.)

#### BALANCE DES PAIEMENTS INTERNATIONAUX DU CANADA (STATISTIQUES HISTORIQUES 1926 à 1990)

Pour la première fois, les données de la balance des paiements sont présentées sous le même format de 1926 à 1990 dans une seule publication. Vous y trouverez:

- toutes les données historiques dans le même volume!
- des tableaux sommaires pour le compte courant et le compte de capital
- des données supplémentaires choisies, telles que les taux de change et le produit intérieur brut ...et tout ceci, dans une publication unique, compacte et bien présentée!

PRIX: 50 \$

Pour commander, prière d'écrire au Service de la Vente des publications de Statistique Canada, Ottawa (Ontario) K1A 0T6, ou de communiquer avec le centre régional de consultation de Statistique Canada le plus proche (la liste apparaît dans cette publication).

Pour commander plus rapidement, utilisez votre carte VISA ou MasterCard et appelez sans frais au

1-800-267-6677

#### LA BALANCE DES PAIEMENT INTERNATIONAUX DU CANADA

Vous voulez une vue complète des opérations internationales du Canada? Alors consultez cette publication trimestrielle qui retrace les marchandises, les services, les revenus de placements et les transferts au compte courant et les opérations financières au compte de capital. Les opérations sont classées selon six régions géographiques.

PRIX: 110 \$
(N°. 67 -001 au cat.)

#### LES TRANSACTIONS INTERNATIONALES DE SERVICES DU CANADA

Cette publication annuelle examine nos pratiques internationales en ce qui concerne les services : voyages, transports, services commerciaux, services gouvernementaux et autres.

PRIX: 32 \$ (N°. 67 -203 au cat.)

#### OPÉRATIONS EN VALEURS MOBILIERES AVEC LES NON-RÉSIDENTS

Sachez qui achète quoi sur les marchés des valeurs mobilières grâce à cette publication mensuelle qui présente le commerce du Canada en actions, obligations et effets du marché monétaire avec les non-résidents. Le numéro de décembre non seulement présente les données complètes de l'année, mais encore une description des sources et des néthodes.

PRIX: 158 \$ (N°. 67 -002 au cat.)

# No other monthly report on the Canadian Economy has this much to offer

## La seule publication à vous offrir autant d'information sur l'économie canadienne

#### Canadian Economic Observer

The most extensive and timely information source for people who want objective facts and analysis on the Canadian Economy... every

#### **Current economic conditions**

Brief, "to the point" a current update summary of the economy's performance including trend analyses on employment, output, demand and the leading indicator.

#### Feature articles

In-depth research on current business and economic issues: business cycles, employment trends, personal savings, business investment plans and corporate concentration.

#### Statistical summary

Statistical tables, charts and graphs cover national accounts, output, demand, trade, labour and financial markets.

#### Regional analysis

Provincial breakdowns of key economic indicators.

#### International overview

Digest of economic performance of Canada's most important trading partners — Europe, Japan and the U.S.

#### Economic and statistical events

Each month, CEO also publishes a chronology of current events that will affect the economy, and information notes about new products from Statistics Canada.

#### Consult with an expert

The names and phone numbers of the most appropriate Statistics Canada contacts are provided with each data table in the statistical summary; not only can you read the data and the analysis, you can talk to the experts about it.

#### The Canadian Economic Observer

(Catalogue no. 11-010) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster service, fax your order to 1-613-951-1584. Or call toll free at 1-800-267-6677 and use your VISA or MasterCard.

#### L'Observateur économique canadien

La revue la plus complète et la plus à jour qui soit pour les gens qui désirent des renseignements objectifs et une analyse de l'économie canadienne... chaque mois.

#### Les conditions économiques actuelles

Résumé bref et incisif de l'actualité économique du mois, comportant l'analyse des tendances de l'emploi, de la production, de la demande et de l'indicateur avancé.

#### Les études spéciales

Recherche approfondie sur les questions du domaine des affaires et de l'économie : cycles économiques, tendances de l'emploi, épargne personnelle, projets d'investissement et concentration des sociétés.

#### L'aperçu statistique

Tableaux, graphiques et diagrammes englobant les statistiques des comptes nationaux, de la production, de la demande, du commerce, de l'emploi

et des marchés financiers.

#### L'analyse régionale

Ventilation par province des indicateurs économiques stratégiques.

#### Le survol de l'économie internationale

Un sommaire du rendement de l'économie des partenaires commerciaux du Canada, comme l'Europe, le Japon et les États-Unis.

#### Événements économiques et statistiques

Chaque mois, L'OEC publie une chronologie des événements qui influenceront l'économie de même que des renseignements sur les nouveaux produits de Statistique Canada.

#### Consultez un expert

Les noms et numéros de téléphone des personnes-ressources figurent à chaque tableau de l'aperçu statistique; non seulement pouvez-vous lire les données et l'analyse, mais vous pouvez de plus discuter du sujet avec les experts de Statistique Canada.

#### L'Observateur économique canadien.

(nº 11-010 au catalogue) coûte 220 \$ l'abonnement annuel au Canada, 260 \$ US aux États-Unis et 310 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

Pour un service plus rapide, commandez par télécopieur au 1-613-951-1584. Ou composez sans frais le 1-800-267-6677 et utilisez votre carte VISA ou MasterCard.

#### Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct on-line access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

#### How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section, Prices Division.

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

| St. John's | (1-800-565-7192) | Winnipeg  | (983-4020) |

#### **Note of Appreciation**

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

#### Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

#### **Symbols**

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

#### NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Registered Trade Mark of Statistics Canada.

#### Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences − Permanence of Paper for Printed Library Materials, ANSI Z39.48 − 1984. 

⊗

#### Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

#### NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Marque déposée de Statistique Canada.

#### Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

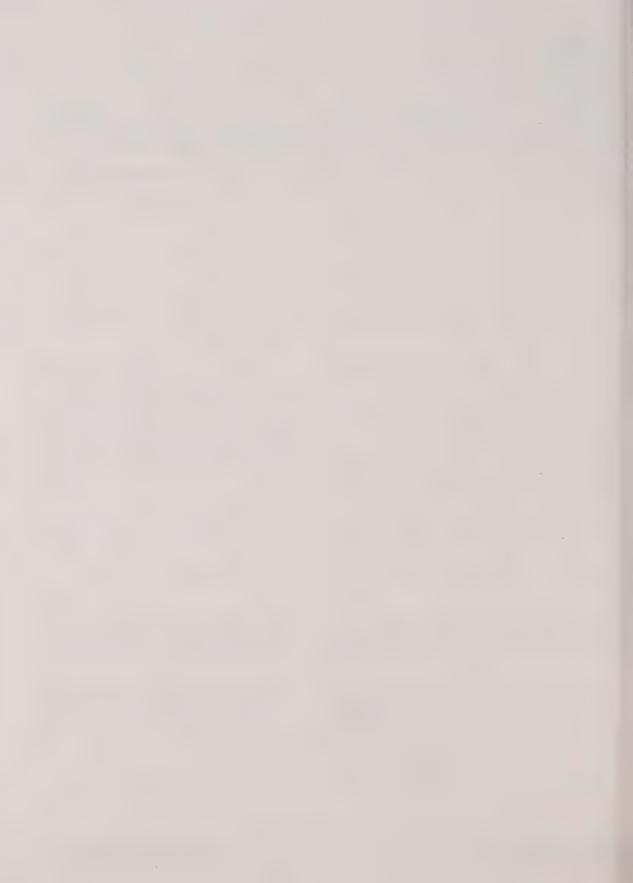

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

This publication was prepared under the direction of:

- Michel Jacod, Director, Prices Division
- Robin Lowe, Chief, Goods & Services Producing Industries Section

#### **Highlights**

#### **Industrial Product Price Index**

Preliminary data indicate that the Industrial Product Price Index (IPPI, 1986 = 100) rose 0.1% from a revised level of 112.0 reported for May. Fifteen of the 21 major groups of products posted increases, four decreased, and two were unchanged. Increases were reported for chemicals and chemical products (0.9%) and autos, trucks and other transport equipment (0.3%), while the lumber, sawmill and other wood products index fell 1.8%.

The value of the American dollar in Canadian funds rose 0.4% in June, increasing the value of export prices quoted in US dollars. From June 1992 to June 1993, the US dollar in Canadian funds gained 7.3%, contributing to the rise in the autos, trucks and other transport equipment index to 109.4, its highest level since 1986.

The IPPI for June 1993 was 2.9% higher than in June 1992. The indexes for second-stage intermediate goods and all finished goods were up, while weaker prices for pulp and primary metal products kept prices for first-stage intermediate goods 2.9% lower than in 1992.

The autos, trucks and other transport equipment index ncreased 0.3% in June from a month earlier and 6.3% from the previous year, owing to the effects of variations in the value of the Canadian dollar on export prices. The price index for automobiles on the domestic market was up 4.6% from 1992, while the index for export automobiles was up 9.3% to 110.5, its highest level since 1986. This upward trend began in September 1991, moderated from April to July 1992, and since then has continued almost without interruption.

The chemicals and chemical products index increased 0.9% over the May figure, mainly owing to 5.0% higher prices for industrial organic chemicals.

The lumber, sawmill and other wood products index was eported down 1.8% in June, the second decrease in as many months. The index remains 16.1% higher than in June 1992. The decrease in June is mainly the result of a 2.2% drop in softwood lumber prices. Decreases ranged from 1.4% for coastal British Columbia lumber to 3.1% for interior BC shipments, but the index was up 0.2% for the Prairies. Declines for different species varied from 1.0% to 2.9%, while prices for Douglas fir lumber increased 1.5%.

#### Faits saillants

#### Indice des prix des produits industriels

Selon les chiffres provisoires, l'indice des prix des produits industriels (IPPI, 1986 = 100) a augmenté de 0,1% par rapport au niveau révisé de 112,0 enregistré en mai. Les indices de 15 des 21 grands groupes de produits augmentent alors que quatre diminuent et deux n'enregistrent aucune variation. Ainsi, l'indice des produits chimiques a augmenté de 0,9%, celui des voitures, camions et autre matériel de transport était en hausse de 0,3% mais l'indice des sciages, produits de scierie et divers produits du bois a diminué de 1,8%.

En juin, la valeur du dollar américain progresse de 0,4% par rapport au dollar canadien, ce qui fait augmenter la valeur du prix des exportations libellées en dollars américains. De plus, entre juin 1992 et juin 1993, le cours du dollar américain par rapport au dollar canadien a augmenté de 7,3% ce qui a contribué à pousser l'indice des voitures, camions et autre matériel de transport à 109,4, son niveau le plus haut depuis

L'IPPI était 2,9% plus haut en juin 1993 qu'en juin 1992. Les indices de prix des produits semi-finis de deuxième étape et ceux de tous les produits finis étaient en hausse alors que la faiblesse des prix de la pâte de bois et des produits métalliques primaires a maintenu les prix des produits semi-finis de première étape 2,9% plus bas que l'an dernier.

L'indice des prix des voitures, camions et autre matériel de transport augmente de 0,3% en juin par rapport à mai et de 6,3% par rapport à 1992, en raison des effets de la variation de la valeur du dollar canadien sur le prix des exportations. Ainsi, l'indice des prix des automobiles vendues sur le marché domestique était en hausse de 4,6% par rapport à 1992 alors que celui des prix des voitures destinées à l'exportation était en hausse de 9,3% et atteint 110,5 son niveau le plus haut depuis 1986. La tendance à la hausse a débuté en septembre 1991. Elle a ralenti entre avril et juillet 1992 pour reprendre de façon presque ininterrompue jusqu'à aujourd'hui.

L'indice des produits chimiques a augmenté de 0,9% par rapport à mai surtout en raison de la hausse de 5,0% des prix des produits chimiques industriels organiques.

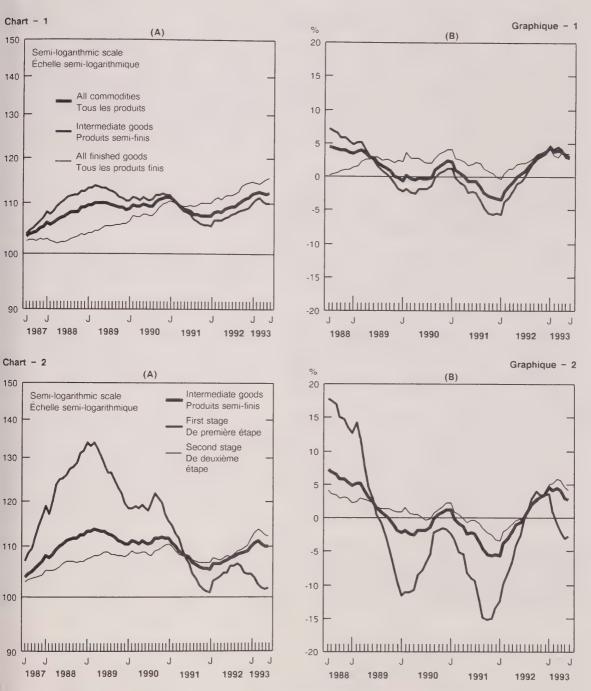

L'indice des prix des sciages, produits de scierie et divers produits du bois enregistre une baisse de 1,8% en juin, ce qui constitue une seconde baisse mensuelle de suite. Il demeure néanmoins supérieur de 16,1% au niveau enregistré en juin 1992. Le recul est surtout attribuable à une chute de 2,2% du prix du bois résineux. L'indice baisse entre 1,4% pour le bois du littorale de la Colombie-Britannique et 3,1% pour celui de l'intérieur de la Colombie-Britannique alors qu'il monte de 0,2% dans les prairies. Parmi les espèces, les baisses varient de 1,0% à 2,9% alors que le prix du bois de sapin de Douglas augmente de 1,5%.

#### Highlights

#### Raw Materials Price Index

Based on preliminary data, the Raw Materials Price Index (RMPI, 1986 = 100) was 114.8 in June 1993, down 0.3% from the previous month. However, five of the seven major indexes were up. The largest increase was in the wood index, at 1.9%, and the other four increases were under 0.5%. These increases were not enough to offset the decreases reported for mineral fuels (-2.7%) and vegetable products (-1.3%). The overall index excluding mineral fuels registered a slight 0.7% increase.

Compared with June 1992 figures, the RMPI was up 6.3%, mainly owing to higher indexes for wood (43.3%) and for animals and animal products (5.7%). The 6.5% decrease in the mineral fuels index was an offsetting factor. The overall ndex excluding mineral fuels rose 12.5% over the last twelve months.

The mineral fuels index was 2.7% lower in June 1993, effecting the 3.0% drop in its principal component, the crude mineral oils index. The mineral fuels index declined 6.5% since June 1992 owing to a drop in the crude mineral oils index -7.3%).

The vegetable products index posted a 1.3% decrease in June 1993, mainly owing to lower indexes for unrefined sugar -10.2%) and grains (-1.0%). The oilseeds index was up 1.7%. Compared with June 1992 figures, the vegetable products index was up 3.6%, reflecting higher indexes for silseeds (15.9%), unrefined sugar (20.2%) and raw tobacco 9.7%). This upward movement was offset somewhat by lecreases in the indexes for grains (-5.6%) and fresh fruit 17.5%).

he wood index was up 1.9% in June 1993 owing to the 1.3% increase in the logs and bolts index, which has been ising steadily since December 1991. However, the monthly ate of increase in the wood index has slowed somewhat in ecent months. Compared with the June 1992 level, the wood idex increased 43.3% on the strength of a 58.7% surge in ne logs and bolts index. The wood index reflects the prices aid by sawmills for wood in the bush, which are affected by tumpage fees as well as recent market conditions in the imber market. Often price movements for logs and bolts lagnose for lumber products.

he animals and animal products index edged up 0.3% in une 1993 as a result of the 8.6% rise in the hogs index. This lorease was partly offset by the decrease in the cattle index 2.3%). From June 1992 to June 1993, the animals and nimal products index rose 5.7%, owing mainly to higher idexes for cattle and calves (17.0%) and hogs for slaughter 10.2%).

#### Faits saillants

#### Indice des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1986 = 100) a atteint 114.8 en juin 1993, soit une diminution de 0,3% par rapport au mois précédent. Cinq des sept indices majeurs ont enregistré des hausses; la plus importante était celle du bois (1,9%), les autres augmentations étant toutes inférieures à 0,5%. Cela fut insuffisant pour contrebalancer la chute des indices des combustibles minéraux (-2,7%), et des substances végétales (-1,3%). L'indice total, sauf les combustibles minéraux a connu une légère augmentation de 0.7%.

Par rapport au mois de juin 1992, l'IPMB a progressé de 6,3%, principalement en raison des augmentations des indices du bois (43,3%), et des animaux et substances animales (5,7%). L'effet à la hausse a été atténué par la baisse de 6,5% de l'indice des combustibles minéraux. L'indice total, sauf les combustibles minéraux a progressé de 12,5% au cours des douze derniers mois.

L'indice des combustibles minéraux a diminué de 2,7% en juin 1993, suite à une diminution de 3,0% de sa principale composante, l'indice des huiles minérales brutes. L'indice des combustibles minérales minérales de 6,5% depuis juin 1992 en raison de la diminution de 7,3% de l'indice des huiles minérales brutes.

L'indice des substances végétales est en baisse de 1,3% en juin 1993, principalement à cause de la diminution des indices du sucre non raffiné (-10,2%), et des céréales (-1,0%). D'autre part, l'indice des oléagineux a augmenté de 1,7%. Par rapport à juin 1992, l'indice des substances végétales a augmenté de 3,6%, en raison de la hausse des indices des oléagineux (15,9%), du sucre non raffiné (20,2%), et du tabac en feuilles (9,7%). Cependant, la progression de l'indice fut atténuée par la diminution des indices des céréales (-5,6%), et des fruits frais (-17,5%).

L'indice du bois a progressé de 1,9% en juin 1993, en raison de l'augmentation de 2,3% de l'indice des billes et billots, qui poursuit sa croissance entreprise en décembre 1991. Soulignons cependant que la croissance mensuelle de l'indice se fait à un taux décroissant depuis les derniers mois. Par rapport à juin 1992, l'indice du bois a augmenté de 43,3%, en raison de la hausse de 58,7% de l'indice des billes et billots. L'indice du bois reflète les prix payés par les scieries pour acheter le bois en forêt lesquels sont influencés par les droits de coupe ainsi que par les récentes conditions dans le marché du bois d'oeuvre. Souvent les mouvements de prix pour les billes et billots ont un retard par rapport à ceux des produits des scieries.

L'indice des animaux et substances animales a connu une très légère progression de 0,3% en juin 1993 qui est attribuable à l'augmentation de l'indice du porc (8,6%). Cette augmentation fut partiellement atténuée par la baisse de l'indice des bovins (-2,3%). De juin 1992 à juin 1993, l'indice des animaux et substances animales a progressé de 5,7% principalement en raison des augmentations des indices des bovins et veaux (17,0%) et du porc destiné à l'abattage (10,2%).

Indexes for the most recent six months shown are subject to revision. Les indices figurant pour les six mois les plus récents sont sujets à révision. Nota:

This shows the amount by which the movement of each index would move the total in the absence of any change in the other indexes.

Ce chiffre donne l'ampleur de la variation qu'occasionnerait dans l'indice d'ensemble un mouvement d'un indice donné si tous les autres indices demeuraient (1) inchangés.
These indexes are preliminary.
Ces indices sont provisoires.

These indexes are preliminary.
Ces indices sont provisoires.
Revised.
Révisé.
The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux différent occasionnellement en raison de l'arrondissement, l'Indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'Indice total – Toutes les industries manufacturières sera posé égal. (3)

#### TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

#### TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits

Indexes for the most recent six months shown are subject to revision.
Les indices figurant pour les six mois les plus récents sont sujets à révision.
The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-ppp-rr where ss indicates the M-level commodity code (from 9 to 28) mm indicates the M-level commodity code (from 14 to 43, 45 to 69) nn indicates either a split of the M-level commodity.

or 91, which indicates a special aggregation or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.
The coverage measure indicates the M-level commodity.

or 1, which indicates the M-level commodity.

or 91, which indicates the properties of the coverage which is estimated from direct surveys (E+S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante le numéro de code. Databank de CANSIM (D nnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

s indique le code du niveau M des produits (de 14 à 43, 45 à 69) nn indique le code du niveau M des produits (de 9 à 28) mm indique le code du niveau M des produits (de 9 à 28) mm indique le code du niveau M des produits (de 9 à 28) mm indique le code GPP (sau

rr indique une composante d'un GPP. La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique un estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E+S). Ces mesures du degré de couverture sont parlois arrondies au 5% le plus près afin d'assurer la confidentialité La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices mesure de l'indice en tant qu'estimation basée sur un échantillon. Les indices mesure de l'indice en tant qu'estimation basée sur un échantillon. Les indices mesure de l'indice en tant qu'estimation basée sur un échantillon. Les indices mesure de l'indice en tant qu'estimation basée sur un échantillon. Les indices mesure de l'indice en tant qu'estimation basée sur un échantillon Les indices mesure de l'indice en tant qu'estimation basée sur un échantillon les indices de l'indice en tant qu'estimation basée sur un échantillon les indices de l'indice en tant qu'estimation basée sur un échantillon les indices de l'indice en tant qu'estimation basée sur un échantillon les indices de l'indice en tant qu'estimation basée sur un échantillon les indices de l'indice en tant qu'estimation basée sur un échantillon les indices de l'indice en tant qu'estimation basée sur l'échantillon les indices de l'indices de l'indice en tant qu'estimation basée sur l'échantillon les indices de l'indices de l'indice e

l'arrondissement, l'indice total - tous les produits devia ette considere comme ceu qui posé égal. The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measures) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices ligurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - tous les industries manufacturières sera

Monthly prices are collected and processed three times per annum.
Des prix mensuels sont relevés et calculés trois fois par année.
Indexes for the current year and previous year are subject to revision.
Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

#### TABLEAU 6. Indices des prix des matières brutes

1986 = 100

|  |                                      |   |   | 300 - 10                                  |   |   |   |                                  |                                  |                                  |                                  |                                  |                                 |                                  |

## EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

#### Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

#### **Price Surveys**

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

## EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

#### Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

#### Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

he market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 300 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement rom other price series.

#### **Veight Base**

commodity and industry weights are taken from the Make" matrix of the 1986 Input/Output table which, 1 turn, is derived from 1986 values reported for the census of Manufacturers and edited to conform to the 980 Standard Industrial Classification. Within-ommodity weights can change in December of each ear to reflect major changes in production patterns.

#### ormula

(agg)

Pto

hained series of fixed weighted price indexes are alculated by a linking procedure whereby more seent varieties and changes to establishments are throduced systematically, as required, in December f each year. Weights from the commodity level wough higher levels of aggregation are held onstant.

he general formula used for the main aggregations escribes the price movement of a specified group of ommodities where w<sup>i</sup> are the values of the output of ach commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

#### Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

#### Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w' sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_{i} \frac{w^{i}}{\sum_{w^{i}}} \cdot P_{t/o}^{i}$$

| ³t/o | denotes the composite price index<br>movement between the base period o and<br>time t for the defined aggregate; |
|------|--|
| γi   | is the transaction value of the element i in the base period:  |

is the price index for element i, meaning its price change from the base period to time 
$$t;\;\;$$

$$P_{t/0}^{'}$$
 est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

$$\Sigma_{\rm i}$$
 signifie la sommation de tous les éléments i dans l'agrégat défini.

#### **Historical Data**

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity indexes (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

#### **Reference Documents**

62-558 Industry Price Indexes, 1986 = 100: users' quide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

#### Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

#### Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

#### RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour s not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 ime base, are published monthly in the Daily Bulletin approximately five weeks after the end of the eference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link actors which were released in the July 1990 issue and repeated in the December issue of this publication.

he index covers purchases of domestically produced nd imported goods by Canadian industry, generally or further processing, and does not cover exports or ows of raw materials directly to final demand orincipally foodstuffs). For example, potatoes bought by food processing manufacturers (for the nanufacture of potato chips, or frozen french fries) re included in the index, but those bought by onsumers directly are not.

s a purchasers' price index, prices should include all harges purchasers incur to bring a commodity to the stablishment gate. Thus transportation charges, ixes net paid and custom duties are all included. So lso are the effects of subsidies, if any are paid to the transport

In the prices are ideally collected from the purchaser, here are several cases where other well known prices re used instead: for example, marketing board prices or eggs and milk, and stockyard prices for some vestock. In a few cases, where data for unprocessed laterials are not available, prices are taken for a milar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed escription of the characteristics of prices for any pmmodity is available from Prices Division on equest.

#### INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entréessorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_{i} \frac{w^{i}}{\sum_{w^{i}}} \cdot P_{t/o}^{i}$$

| P <sub>t/o</sub> | denotes the composite price index movement between the base period o and time t for the defined aggregate; | P <sub>t/o</sub> | dénote le mouvement de l'indice composite de prix<br>entre la période de référence o et la période courante<br>t pour l'agrégat spécifié; |
|------------------|--|------------------|---|
| wi               | is the transaction value of the element i in 1986;   | wi               | est la valeur de transaction de l'élément i en 1986;  |
| P <sub>t/o</sub> | is the price index for element i, meaning its price change from the base period o to time t;               | P <sub>t/o</sub> | est l'indice de prix de l'élément i, c'est-à-dire son<br>changement de prix de la période de référence o à la<br>période courante t;      |
| $\sum_{i}$       | indicates summation over all elements i in   | $\sum_{i}$       | indique la sommation sur tous les éléments i faisant  |

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

the defined aggregate.

#### À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

partie de l'agrégat spécifié.

#### Reference Document

See reference document in IPPI. Document contains the weighting pattern of the Raw Materials Price Indexes.

#### Document de référence

Voir le document de référence de l'IPPI, qui contient le schéma de pondération des indices de prix des matières brutes.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, (613)951-9607 ou 951-3350, télécopieur téléphone (613)951-2848.

#### ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are eported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are eleased with other monthly Industry Price Indexes for April, August and December of each year. The needs have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index ormulation, which is the same as that described for he Industrial Product Price Indexes, 1986=100, echnical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to evision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 981 = 100. The new, 1986 = 100 indexes can be nked with their equivalents in the 1981 = 100 series ising the link factors which were released in the July 990 issue and repeated in the December issue of his publication.

for further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, elephone (613)951-9607 or 951-3350, facsimile 313)951-2848.

#### INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

Survey Methodology is dedicated to the theory and practice of survey taking. Published twice a year, this Statistics Canada journal provides a unique outlet for research and scholarship on topics that span the survey process from data collection, through analysis to evaluation.

Each issue of *Survey Methodology* presents a carefully selected collection of articles that combine solid insights with readability. Special sections with forward-looking articles examine emerging issues in the field and alert subscribers to the best current survey techniques. Recent special topics have included:

- Census Undercount Measurement Methods and Issues
- New Approaches to Data Collection and Capture
- Time Series Methods in Surveys
- History and Emerging Issues in Censuses and Surveys
- Data Analysis
- L Statistical Uses of Administrative Data

Survey Methodology thrives on the contributions of experts from Canada and around the world. You can count on articles and overviews that are authoritative and complete.

Survey Methodology (Cat. no. 12-001) costs \$35 in Canada, US \$ 42 in the United States, and US \$ 49 in other countries. To order, write to:

Techniques d'enquête est une revue de Statistique Canada publiée deux fois l'an et consacrée aux aspects théoriques et pratiques des enquêtes. Aux fins de la recherche et des études, c'est une source d'information unique sur les diverses facettes des enquêtes comme la collecte, l'analyse et l'évaluation des données.

Chaque numéro de *Techniques d'enquête* présente un choix judicieux d'articles bien structurés et agréables à lire. Dans des sections spéciales qui s'orientent vers l'avenir, on présente des articles sur l'évolution du domaine et on met le lecteur sur la piste des meilleures techniques d'enquête à l'heure actuelle. Au nombre des sujets parus récemment :

- Méthodes et questions concernant la mesure du sous-dénombrement du recensement
- Nouvelles approches pour la collecte et la saisie des
- Séries chronologiques dans les enquêtes
- Histoire et questions actuelles dans le domaine des recensements et des sondages
- Analyse de données
- Utilisations statistiques des données administratives

Techniques d'enquête réunit les contributions d'experts du pays et de la scène internationale, de manière à vous offrir un éventail d'articles et d'aperçus qui font autorité.

L'abonnement annuel à *Techniques d'enquête* (n° 12-001 au Catalogue) coûte 35 \$ au Canada, 42 \$ US aux États-Unis et 49 \$ US dans les autres pays. Pour commander, écrivez à :

Statistique Canada Statistics Canada Canadä

# HIRE OUR TEAM OF RESEARCHERS FOR \$53 A YEAR

### NOTRE ÉQUIPE DE CHERCHEURS EST À VOTRE SERVICE POUR 53\$PAR ANNÉE

Subscribing to Perspectives on Labour and Income is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But Perspectives is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analysing the statistics to bring you simple, clear summaries of where the labour market and income distributions are headed.

Our team of experts is working to bring you the latest labour and income data. Each quarterly issue has:

- · topical articles on current labour and income trends
- more than 50 key labour and income indicators
- · a review of ongoing research projects
- · information on new survey results

As a special bonus, twice a year you will also receive a Labour Market Review, giving you up-to-the-minute analysis and data of how the labour market has performed over the last six months or year.

#### And all for only \$53.00.

Thousands of Canadian professionals turn to **Perspectives** to discover new trends in labour and income and to stay up-to-date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find **Perspectives** indispensable. GUARANTEED. If you aren't convinced after reading your first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to **Perspectives** today.

#### ORDER NOW!

For only \$53 (plus \$3.71 GST)
you will receive the latest labour
and income research (4 issues
per year). Subscription rates
are US\$64 for U.S. customers
and US\$74 for customers outside
North America.

## To those of you who need in-depth information about the labour market...

... Statistics Canada produces *Labour Force Annual Averages 1992 –* a reference publication created specifically to meet those needs. With detailed data ... Quick-reference summaries and graphs ... Geographical breakdowns in unprecedented detail ... More variables and cross classifications than published in the monthly issues of *The Labour Force*.

The Labour Force Annual Averages 1992 covers:

- an overview of employment in the major groups of the goods-producing industries over the period 1976 to 1992;
- time loss and absenteeism by industry and province;
- full-time and part-time employment by industry and province;
- occupations for Census Metropolitan Areas (CMAs) and economic regions;
- industries for CMAs and economic regions;
- labour market participation and family responsibilities by province;
- and more.

Labour Force Annual Averages 1992. Part and parcel of Statistics Canada's customer-driven approach to business information.

Labour Force Annual Averages 1992 (catalogue number 71-220) is available for \$39 in Canada, US\$47 in the United \$\text{States}\$ and US\$55 in other countries.

To order, write Marketing Division, Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact the Statistics Canada Regional Reference Centre nearest you. (A list appears in this publication.)

For faster ordering, fax your order to (613) 951-1584. Or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

#### À ceux d'entre vous qui désirent obtenir de l'information plus détaillée sur le marché du travail...

... Statistique Canada présente Moyennes annuelles de la population active 1992 – un document de référence créé spécialement à votre intention. Vous y trouverez des données détaillées, des sommaires et des graphiques faciles à consulter, des ventilations géographiques plus détaillées qu'auparavant et davantage de variables et de recoupements qu'il n'en paraît dans les numéros mensuels de La population active.

Moyennes annuelles de la population active 1992 porte sur:

- un aperçu de l'emploi dans les groupes majeures des branches productrices de biens au cours de la période 1976 à 1992;
- les heures perdues et l'absentéisme, ventilés par secteur d'activité et province;
- l'emploi à plein temps et à temps partiel, ventilé par secteur d'activité et province;
- les professions dans les régions métropolitaines et les régions économiques;
- les secteurs d'activité dans les régions métropolitaines et les régions économiques;
- la participation au marché du travail et les obligations familiales selon la province;
- et bien d'autres.
